RE: No Exposure Certification for Exclusion from NPDES Storm Water Permitting

Dear Mr. Gertler:

As per our recent telephone conversation, I have enclosed the EPA forms for No Exposure Certification for Exclusion from NPDES Storm Water Permitting for our four vehicle maintenance facilities. These facilities have storm water permits with the following registration numbers: 95-SW-0744, 95-SW-0745, 95-SW-0746, and 95-SW-0747. Please feel free to call me at 410 347-4277 if you need any additional information. Thank you.

Sincerely,

A handwritten signature in cursive script that reads "Richard H. Hass".

Richard H. Hass  
Environmental Compliance Coordinator (A)

Enclosures: No Exposure Certification for Exclusion from NPDES Storm Water Permitting for four facilities

**NO EXPOSURE CERTIFICATION for Exclusion from  
NPDES Storm Water Permitting**

Submission of this No Exposure Certification constitutes notice that the entity identified in Section A does not require permit authorization for its storm water discharges associated with industrial activity in the State identified in Section B under EPA's Storm Water Multi-Sector General Permit due to the existence of a condition of no exposure.

A condition of no exposure exists at an industrial facility when all industrial materials and activities are protected by a storm resistant shelter to prevent exposure to rain, snow, snowmelt, and/or runoff. Industrial materials or activities include, but are not limited to, material handling equipment or activities, industrial machinery, raw materials, intermediate products, by-products, final products, or waste products. Material handling activities include the storage, loading and unloading, transportation, or conveyance of any raw material, intermediate product, final product or waste product. A storm resistant shelter is not required for the following industrial materials and activities:

- drums, barrels, tanks, and similar containers that are tightly sealed, provided those containers are not deteriorated and do not leak. "Sealed" means banded or otherwise secured and without operational taps or valves;
- adequately maintained vehicles used in material handling; and
- final products, other than products that would be mobilized in storm water discharges (e.g., rock salt).

A No Exposure Certification must be provided for each facility qualifying for the no exposure exclusion. In addition, the exclusion from NPDES permitting is available on a facility-wide basis only, not for individual outfalls. If any industrial activities or materials are or will be exposed to precipitation, the facility is not eligible for the no exposure exclusion.

By signing and submitting this No Exposure Certification form, the entity in Section A is certifying that a condition of no exposure exists at its facility or site, and is obligated to comply with the terms and conditions of 40 CFR 122.26(g).

ALL INFORMATION MUST BE PROVIDED ON THIS FORM.

Detailed instructions for completing this form and obtaining the no exposure exclusion are provided on pages 3 and 4.

**A. Facility Operator Information**

1. Name: UNITED STATES POSTAL SERVICE 2. Phone: 4103474268  
3. Mailing Address: a. Street: 9101 EASIT FAYETTE STREET  
b. City: BALTIMORE c. State: MD d. Zip Code: 2112331-9998

**B. Facility/Site Location Information**

1. Facility Name: VEHICLE MAINTENANCE FACILITY  
2. a. Street Address: 601 WEISITOLIVE STREET  
b. City: BALTIMORE c. County: BALTIMORE  
d. State: MD e. Zip Code: 2112011-9351  
3. Is the facility located on Indian Lands? Yes ☐ No ☒  
4. Is this a Federal facility? Yes ☒ No ☐  
5. a. Latitude: 39° 18' 30" b. Longitude: 76° 37' 00"  
6. a. Was the facility or site previously covered under an NPDES storm water permit? Yes ☒ No ☐  
b. If yes, enter NPDES permit number: 95-SW-0747  
7. SIC/Activity Codes: Primary: 43111 Secondary (if applicable): 7538  
8. Total size of site associated with industrial activity: 3.34 acres  
9. a. Have you paved or roofed over a formerly exposed, pervious area in order to qualify for the no exposure exclusion? Yes ☐ No ☒  
b. If yes, please indicate approximately how much area was paved or roofed over. Completing this question does not disqualify you for the no exposure exclusion. However, your permitting authority may use this information in considering whether storm water discharges from your site are likely to have an adverse impact on water quality, in which case you could be required to obtain permit coverage.  
Less than one acre ☐ One to five acres ☐ More than five acres ☐

## C. Exposure Checklist

Are any of the following materials or activities exposed to precipitation, now or in the foreseeable future?  
(Please check either "Yes" or "No" in the appropriate box.) If you answer "Yes" to any of these questions  
(1) through (11), you are not eligible for the no exposure exclusion.

	Yes	No
1. Using, storing or cleaning industrial machinery or equipment, and areas where residuals from using, storing or cleaning industrial machinery or equipment remain and are exposed to storm water	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2. Materials or residuals on the ground or in storm water inlets from spills/leaks	<input type="checkbox"/>	<input checked="" type="checkbox"/>
3. Materials or products from past industrial activity	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4. Material handling equipment (except adequately maintained vehicles)	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5. Materials or products during loading/unloading or transporting activities	<input type="checkbox"/>	<input checked="" type="checkbox"/>
6. Materials or products stored outdoors (except final products intended for outside use [e.g., new cars] where exposure to storm water does not result in the discharge of pollutants)	<input type="checkbox"/>	<input checked="" type="checkbox"/>
7. Materials contained in open, deteriorated or leaking storage drums, barrels, tanks, and similar containers	<input type="checkbox"/>	<input checked="" type="checkbox"/>
8. Materials or products handled/stored on roads or railways owned or maintained by the discharger	<input type="checkbox"/>	<input checked="" type="checkbox"/>
9. Waste material (except waste in covered, non-leaking containers [e.g., dumpsters])	<input type="checkbox"/>	<input checked="" type="checkbox"/>
10. Application or disposal of process wastewater (unless otherwise permitted)	<input type="checkbox"/>	<input checked="" type="checkbox"/>
11. Particulate matter or visible deposits of residuals from roof stacks and/or vents not otherwise regulated (i.e., under an air quality control permit) and evident in the storm water outflow	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## D. Certification Statement

I certify under penalty of law that I have read and understand the eligibility requirements for claiming a condition of "no exposure" and obtaining an exclusion from NPDES storm water permitting.

I certify under penalty of law that there are no discharges of storm water contaminated by exposure to industrial activities or materials from the industrial facility or site identified in this document (except as allowed under 40 CFR 122.26(g)(2)).

I understand that I am obligated to submit a no exposure certification form once every five years to the NPDES permitting authority and, if requested, to the operator of the local municipal separate storm sewer system (MS4) into which the facility discharges (where applicable). I understand that I must allow the NPDES permitting authority, or MS4 operator where the discharge is into the local MS4, to perform inspections to confirm the condition of no exposure and to make such inspection reports publicly available upon request. I understand that I must obtain coverage under an NPDES permit prior to any point source discharge of storm water from the facility.

Additionally, I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Jerry Lane  
United States Postal Service  
900 East Fayette Street  
Baltimore MD 21233-9998

Dear Mr. Lane:

The Maryland Department of the Environment has received your No Exposure Certifications for Exclusion from National Pollutant Discharge Elimination System (NPDES) Storm Water Permitting. In signing these documents, you have certified that the facilities located at **6801 Oak Hall Lane, Columbia MD; 8210 Harford Road, Baltimore; 6 Waelchi Avenue, Baltimore; and 60 West Oliver Street, Baltimore** do not need an NPDES permit for its storm water according to the criteria established in 40 CFR 122.26 (Code of Federal Regulations), which implement requirements under the federal Clean Water Act.

Please note that the above regulations require that you resubmit this certification no later than five years from the date of your present certification if storm water exposure conditions at the above-referenced facility remain the same. If you later determine that potential for exposure exists, you must submit a notice of intent for coverage under the State's general permit for storm water associated with industrial activity. In the meantime, inspectors from the Department may call on you to verify the terms of your certifications.

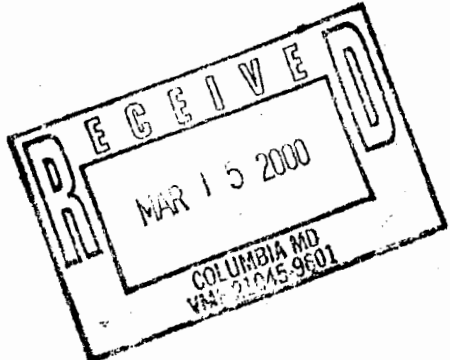

If you have any questions, please do not hesitate to call me at (410) 631-3323.

Sincerely,

Edward Gertler, Technical Advisor  
Industrial Discharge Permits Division  
Wastewater Permits Program

**Inspection Reason:** Routine Scheduled  
Initial Inspection for Current Fiscal Year

### INSPECTION FINDINGS

A joint US EPA/MDE inspection of the USPS- Baltimore Veh. Maintenance Facility was conducted this date and resulted in the following observations on the water side:

- Mr. Crutchley, Mr. Jimenez of the EPA, and myself met with USPS Mgr Mr. Peters, and Mr. Powell. We discussed the facility, and its relationship to the various EPA regulated programs. In particular the past 97-SW-0747 permit was discussed. On Feb 15, 2000, USPS Env. Coordinator filed a Non Exposure exclusion for the Facility as well as No Exposures for the Columbia, Parkville, and Halethorpe Facilities. Therefore the Baltimore Veh. Maintenance Facility had no 02-SW coverage. The facility works on 1400 vehicles including LLVs, tractor trailers, cargo vans. Some vehicles are stored on site awaiting maintenance. I received information this date from Ed Gertler, MDE Industrial Permits coordinator, that vehicle maint. shops where trucks are stored are not exempt from the 02-SW General Industrial Permit, therefore within 14 days, the USPS must obtain 02-SW coverage under the General Industrial Permit. The Facility must also develop a stormwater pollution prevention plan(SWPPP) within 30 days as required by the plan. The plan will require an annual site evaluation and training of personnel.

The facility has approx. 5 in door inlets as well as a wash booth for vehicle cleaning. They are tied into a common line then to an oil/water separator. No other sources of water were noted that discharge to the storm drains of Balto City.

- A tour of the outdoor and indoor facilities was conducted with the following stormwater issues noted:

**Permit / Approval Numbers:** 97-SW-0747

**Date/Time:** 11/24/2003

**Facility Address:** 60 West Oliver St  
Baltimore, Md 21233

-There was a discharge of oil/antifreeze products noted from 2 work bays which then discharged to an outside parking lot storm drain. Mr. Peters determined that the indoor bays were washed out toward the outside doors. He stated that the bays should have been washed toward the internal storm drains. A small berm must be constructed across the bay access's as discussed to stop the discharge of oil/antifreeze products. This should be performed ASAP. The discharge of oil/antifreeze or other pollutants to outside storm drains and waters of the state is a violation of Env. Article 9-322, Discharge of Pollutants prohibited.

- The internal storm drains and oil/water separator were inspected. The lid of the separator was removed and did not appear to have any maintenance performed recently , heavy sed. was noted on the lid. Within 14 days, Mr. Peters will also hire a Company to come in and certify that internal storm drains are connected to the sanitary sewer. If the drains are not tied to the sanitary lines, they must be connected immediately. There is a discharge of wash water from the veh. washing facility, which must go to the sanitary sewer.

Mr. Peters will also determine the need for 02-SW coverage for the other veh. maintenance facilities in Md, after consulting with Ed Gertler. I will follow-up within the next 30 days for stormwater issues noted above. A copy of this report was issued to the USPS and EPA. Photos were taken by the EPA.

## NOTICE OF COMPLIANCE

Mr. Robert Williams  
U.S. Postal Service  
Suite 400  
10400 Little Patuxent Parkway  
Columbia MD 21044-3510

**RE: Case Nos. 93-0213 and 99-2153 BC2**  
**U.S. Post Office**  
**60 West Oliver Street**  
**Baltimore, Maryland**  
**Facility I.D. No. 0007084**

Dear Mr. Williams:

A representative of the Waste Management Administration's Oil Control Program recently reviewed the Administration's case files concerning the above-referenced facility. Based on this review, it has been determined that 15 underground storage tanks have been removed; and 10 monitoring wells have been installed and sampled. The Administration does not require further corrective action at this facility based on the absence of liquid phase hydrocarbons in the monitoring wells and site characteristics. Thus, the above-referenced property is now in compliance with Code of Maryland Regulations 26.10.09.03A(6)-(7) and 26.10.10.02-.03. The Administration hereby closes its cases in reference to this site.

The monitoring wells may be abandoned in compliance with Code of Maryland Regulation 26.04.04. We recommend that you contact the Baltimore City Health Department at 410-396-4422 concerning the well abandonments. This notice should not be construed as a waiver of the Administration's right to take enforcement action in regards to activities not addressed by the referenced cases. Please be advised that you are responsible for completing and updating the registration information filed with the Department regarding the installation, upgrade, or closure of underground storage systems. Please feel free to contact the Oil Control Program if you have any questions concerning this matter at 410-631-3442.

Sincerely,

Thomas L. Walter, Region II Section Head  
Compliance/Remediation Division  
Oil Control Program

## UNDERGROUND STORAGE TANK REGISTRATION

### CERTIFICATE OF CLOSURE

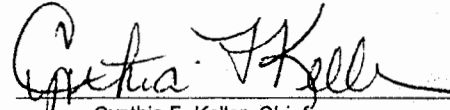

Issued: April 2, 1999

This certifies that **U. S. Postal Service**

has duly amended their Underground Storage Tank registration as required by Code of Maryland Regulation 26.10.03.09, to show the closure of underground storage tank system(s) located at the following location:

Facility Address:

USPS Baltimore Vehicle Maintenance Facility  
60 West Oliver Street  
Baltimore, MD 21201

  
Cynthia F. Keller, Chief  
Office of Resource Management  
Oil Control Program

This certificate replaces the Certificate of Registration issued to you on August 3, 1998. If in the future you decide to install new underground storage tanks, you are required to file an amended underground storage tank registration form as required by Environment Article Section 4-411.1, Annotated Code of Maryland.

TANK NUMBER	STATUS	DESCRIPTION	SUBSTANCE STORED	CLOSURE STATUS
001	Permanently Out of Use	5,000 gal. Gasoline		Tank removed from ground
002	Permanently Out of Use	5,000 gal. Gasoline		Tank removed from ground
003	Permanently Out of Use	6,000 gal. Diesel		Tank removed from ground
004	Permanently Out of Use	550 gal. Other		Tank removed from ground

## EXECUTIVE SUMMARY

---

Apex Environmental, Inc. (Apex) was retained by the U.S. Postal Service (USPS) to perform inspection services at the main Vehicle Maintenance Facility (VMF) located at 60 West Oliver Street, Baltimore, Maryland. The facility was inspected for the presence of asbestos, lead-based paint (LBP), and radon on June 3 and 4, 1996.

### ASBESTOS

All accessible areas of the main VMF were inspected for suspect asbestos-containing building materials (ACBMs). A total of 27 bulk samples were collected of suspect ACBMs. Analytical results confirmed that asbestos is not present in any of the identified suspect materials observed. However, assumed asbestos-containing pipe insulation was observed outside the building above the gas pumps. This aircell-insulated pipe was approximately 100 feet long leading from the main building to the gas pumps then bending to the right. No samples could be taken due to the unreachable height. In addition, asbestos was assumed, not confirmed, to be present in identified fire doors within the building. These doors were identified by the fire rating plates located on the respective door jambs, see Asbestos Section C, Homogeneous Materials Summary by Functional Floor and Area Location). No areas of the building were found to have ACBMs causing high or imminent exposure potential.

### LEAD

Apex conducted a lead paint inspection at the main VMF using an X-ray fluorescence (XRF) direct-reading analyzer. A total of 90 readings were taken of suspect LBP surfaces. In addition, a total of six calibration readings were collected during the inspection. Results indicated that a total of four different types of painted surfaces tested contain LBP. The lead paint section of this report provides the specific locations and results of all analyses conducted.

### RADON

Apex did not conduct any monitoring for radon at the main VMF as all occupiable construction was above grade.

## MATERIAL SAFETY DATA SHEET

The purpose of this data sheet is to obtain technical information for each specific material from the manufacturer. This information is required to evaluate health, safety and environmental hazards, determine proper use, and make final recommendations for use of the material. The information requested will be kept confidential only as necessary to meet requirements of the Occupational Safety and Health Act of 1970 or by any other Federal, State or Local regulations.

SECTION I	
MANUFACTURER'S NAME THE UNITED OIL COMPANY, INC.	EMERGENCY TELEPHONE (301) 342-1200
ADDRESS (Number, Street, City, State, and ZIP Code) BALTIMORE & KRESSON STS., BALTIMORE, MD. 21224	
CHEMICAL NAME AND SYNONYMS SOLVENT REFINED PARAFFINIC DISTILLATES	TRADE NAME AND SYNONYMS SUPERALINE HYDRAULIC OIL
CHEMICAL FAMILY HYDROCARBON	FORMULA PROPRIETARY

SECTION II - HAZARDOUS INGREDIENTS			
PAINTS, PRESERVATIVES & SOLVENTS	%	TLV (Units)	ALLOYS AND METALLIC COATINGS
Pigments			Base Metal
Catalyst			Alloys
Vehicle			Metallic Coatings
Solvents			Filler Metal Plus Coating or Core Flux
Additives	1		Others
Others REFINED MINERAL OILS	99		
HAZARDOUS MIXTURES OF OTHER SOLVENTS			
NOT APPLICABLE			

SECTION III - PHYSICAL DATA		
Boiling Point (°F)	WIDE	Specific Gravity (H <sub>2</sub> O = 1)
Vapor Pressure (mm Hg.)	BELOW	Percent (Volume by Volume) (%)
Vapor Density (Air = 1)	14+	Evaporation Rate (ETHYL ETHER)
Solubility in Water	INSOLUBLE	
Appearance and Odor		

SECTION IV - FIRE AND EXPLOSION HAZARD DATA		
Flash Point (Method used) 435 °F (COC) MIN.	Flammable Limits	LEL NOT D
Extinguishing Media WATER FOG, CHEMICAL FOAM, DRY CHEMICAL, CO <sub>2</sub>		
Special Fire Fighting Procedures WEAR SELF CONTAINED BREATHING GEAR WHEN FIGHTING IN CONFINED SPACES.		
Unusual Fire and Explosion Hazards		

SECTION V - HEALTH HAZARD DATA	
Threshold Limit Value	NO OSHA STANDARD OR THRESHOLD LIMIT VALUE HAS BEEN ESTABLISHED FOR THIS PRODUCT.
Effects of Overexposure	INHALATION - NONE EXPECTED TO 25 MG. OIL MIST PER CUMETER OF AIR, PRACTICALLY NON-TOXIC BY SKIN ABSORPTION, MILD EYE IRRITATION.
Emergency and First Aid Procedures	INHALATION - NONE NORMALLY REQUIRED, SKIN - WASH WITH SOAP AND WATER, EYES - IMMEDIATELY FLUSH EYES WITH PLENTY OF WATER FOR AT LEAST 15 MINUTES. IF REDNESS OR IRRITATION PERSISTS, MEDICAL HELP.

SECTION VI - REACTIVITY DATA			
Stability	Unstable		Conditions to Avoid
	Stable	X	
Incompatibility (Materials to avoid) STRONG OXIDIZERS			
Hazardous Decomposition Products MAY PRODUCE OXIDES OF CARBON, PHOSPHORUS, SULFUR, ZINC, HYDROGEN SULFIDE, AND CALCIUM			
Hazardous Polymerization	May Occur		Conditions to Avoid
	Will Not Occur	X	

SECTION VII - SPILL OR LEAK PROCEDURES	
Steps to be Taken in Case Material is Released or Spilled	
CONTAIN SPILL. CLEAN UP USING AN OIL ABSORBENT.	
Waste Disposal Method FEDERAL, STATE, AND LOCAL REGULATIONS COVER DISPOSAL.	

SECTION VIII - SPECIAL PROTECTION INFORMATION			
Respiratory Protection (Specify type) CONCENTRATION IN AIR DETERMINES PROTECTION			
Ventilation	Local Exhaust	VENTILATE AS NEEDED TO MAINTAIN	Special
	Mechanical (General)	WORKPLACE ENVIRONMENTAL LIMIT	Other
Protective Gloves		RECOMMENDED	Eye Protection
Other Protective Equipment		IF CONTACT IS UNAVOIDABLE, WEAR OIL IMPERVIOUS CLOTHING	

SECTION IX - SPECIAL PRECAUTIONS	
Precautions to be Taken in Handling and Storing	
KEEP AWAY FROM FIRE, SPARKS, AND FLAMES. STORAGE PER NFPA CLASS III B.	
Other Precautions	

IF SWALLOWED, DO NOT INDUCE VOMITING  
CALL A PHYSICIAN IMMEDIATELY.

## Part 5

# INSPECTOR CHECKLIST FOR INSPECTIONS OF FEDERAL FACILITIES FOR COMPLIANCE WITH SECTION 6002 OF THE RESOURCE CONSERVATION AND RECOVERY ACT

**Note to inspectors:** If the facility has no motor vehicle maintenance shop, please provide the Inspection Questionnaire to the facility and note on the top of this form that the facility does not maintain vehicles onsite. If the facility has more than one motor vehicle maintenance shop, please indicate whether the response to questions listed below reflect practices at the entire facility or only the shop(s) inspected.

Re-refined oils and lubricants:

### Background questions:

Approximately how many vehicles are serviced for replacement or addition of oils and lubricants by the shop or facility annually? ~1400

What type of vehicles are serviced? (e.g., sedans, trucks, heavy equipment, aircraft)

passenger vehicles (sedans), small postal delivery vehicles, LLVs  
Cargo vans, and tractor trailers (Long life vehicles)

### Specific questions regarding use of oil and lubricants:

What is the estimated annual consumption of oil and lubricants in the shop?

Motor oil: 2,000 gallons

other lubricants: 700-800 gallons

Approximately how frequently is the engine oil replaced in facility vehicles?

Every \_\_\_\_\_ miles or \_\_\_\_\_ months 26 week cycle for most vehicles  
6 week cycle for tractor trailers and cargo vans

Does the facility or shop test the oil to determine if replacement is needed?

yes \_\_\_\_\_ no X

Does the shop or facility use re-refined oil for replacement engine lubricating (motor) oils?

yes X no \_\_\_\_\_ 90% of the time. They use virgin oil for some of the tractor trailers because of manufacturer's specifications

Does the shop or facility use re-refined oil for replacement hydraulic fluids?

yes \_\_\_\_\_ no \_\_\_\_\_ N/A

Does the shop or facility use re-refined oil for replacement gear oils?

yes \_\_\_\_\_ no \_\_\_\_\_ use mostly synthetic

Do shop containers containing unused oils and other lubricants indicate these products are re-refined?

Oil - yes ☒ no ☐

Hydraulic fluids - yes ☐ no ☒ N/A

Gear oils - yes ☒ no ☐

Is the shop or facility aware of the RCRA/CPG requirement to use re-refined oils or lubricants?  
yes ☒ no ☐

If the facility is aware of the requirement to use re-refined oils and lubricants and still does not use these products, what is their explanation for not using these products?

Re-refined is too expensive ☐

Specifications don't allow use of re-refined ☒ (for some vehicles)

Re-refined is not available ☒ did not use it for a period of

Other ☐ time because it was not available

Where does the shop or facility purchase oil and other lubricants?

Commercial bulk vendor (e.g., Safety Kleen) yes ☐ no ☐

Govt. vendor (e.g., DLA, GSA) yes ☒ no ☐

Local commercial vendor (e.g., auto supply) yes ☐ no ☐

Other ☐

Do shop or facility personnel purchase oil or other lubricants for use in the shop using a government charge card or account at a commercial vendor (e.g., K-Mart or Sears) outside of the facility? Always ☒ Occasionally ☐ Never ☐

What is the fate of used oil removed from the facility's vehicles?

Disposed of as hazardous waste ☐

Picked up by vendor for "recycling" ☒

Reused at facility for heating fuel ☐

Other ☐

If the oil is collected or sent out to a recycler, is it ultimately used for energy recovery or is it re-refined? Energy recovery ☒ Re-refined ☐ Don't know ☐

## RETREAD TIRES:

### Background questions:

Approximately how many tires does the shop or facility replace annually? ~ 2,000 - 3,000

What type(s) of replacement tires does the shop or facility use?

Bus yes \_\_\_\_\_ no \_\_\_\_\_  
Heavy truck yes ☒ no \_\_\_\_\_  
Pickup truck yes \_\_\_\_\_ no \_\_\_\_\_  
Passenger vehicle yes ☒ no \_\_\_\_\_  
Other cargo vans and LLVs

### Specific questions regarding the use of retread tires:

Does the shop or facility install retread tires on facility vehicles onsite? yes ☒ no \_\_\_\_\_

If yes, for which types of tires?

Bus \_\_\_\_\_  
Heavy truck ☒  
Pickup truck \_\_\_\_\_  
Passenger vehicle \_\_\_\_\_  
Other cargo vans and LLVs

Does the shop or facility have in place an agreement or contract with a "retreader" to retread the facility's tires? yes ☒ no \_\_\_\_\_

Does the shop or facility use an outside service or vendor for tire replacement?

yes ☒ no \_\_\_\_\_ occasionally

If yes, does that vendor offer retread tires? yes \_\_\_\_\_ no \_\_\_\_\_ don't know \_\_\_\_\_

If yes, does the facility purchase these tires? yes ☒ no \_\_\_\_\_

Is the shop or facility aware of the RCRA/CPG requirement to use retread tires?

yes ☒ no \_\_\_\_\_

If the shop or facility is aware of the requirement to do so yet still do not use retread tires, what is the explanation for not using these products?

Retread tires are "unsafe" \_\_\_\_\_

Specifications don't allow use of retread tires \_\_\_\_\_

Retread tires are not available to the facility ☒ (for sedans)

Other \_\_\_\_\_

Does the shop or facility purchase retread tires for use in the shop using a government charge card or account at a commercial vendor (e.g., Bandag, Goodyear, or other retreader) outside of the facility? Always X Occasionally \_\_\_\_\_ Never \_\_\_\_\_

How are used tires disposed of by the facility?

sent to the retreader

## ENGINE COOLANTS:

### Background questions:

Approximately how many vehicles are serviced for replacement or addition of coolants by the shop or facility annually? 600-700

What type of vehicles are serviced? (e.g., sedans, trucks, heavy equipment)

passenger vehicles (sedans), small postal delivery vehicles, LRVs  
cargo vans and tractor trailers (long life vehicles)

### Specific questions regarding shop or facility use of engine coolants:

Where does the shop or facility purchase coolant (reclaimed or virgin)?

Commercial bulk vendor (e.g., Safety Kleen) yes \_\_\_\_\_ no \_\_\_\_\_

Govt vendor (DLA, GSA) yes \_\_\_\_\_ no \_\_\_\_\_

Local commercial vendor (e.g. auto supply) yes X no \_\_\_\_\_

Other \_\_\_\_\_

Approximately how frequently is the coolant changed in each vehicle?

Every \_\_\_\_\_ miles or 24 months?

What is the estimated average annual usage of coolant in this shop or facility?

700 gallons

Does the shop or facility use reclaimed engine coolant?

yes X no \_\_\_\_\_

Does the shop or facility have in place an agreement or contract with a vendor to reclaim the facility's used coolant? yes X no \_\_\_\_\_

Does the shop or facility have on-site, a reclamation device to reclaim used coolant?

yes \_\_\_\_\_ no X

Is the shop aware of the RCRA/CPG requirement to use reclaimed coolant? yes X no \_\_\_\_\_

If the facility is aware of the requirement to do so yet still do not use reclaimed coolant, what is the explanation for not using this product?

Reclaimed coolant is not effective \_\_\_\_\_

Specifications don't allow use of reclaimed coolant \_\_\_\_\_

Reclaimed coolant is not available to the facility X (at times)

Coolant reclamation devices are too costly \_\_\_\_\_

Other \_\_\_\_\_

Does the facility purchase coolant (reclaimed or virgin) for use in the shop using a government charge card at a commercial vendor (e.g., K-Mart or Sears) outside of the facility?

How does the facility dispose of coolant that is removed from facility vehicles (and is not reclaimed)? N/A

\*\*\*\*\*

Please add any additional observations regarding this inspection.
